

Web-based Network for Setting up a Management System according to ISO 45001

Your advantages at a glance

Time savings	> Webinars save you time on travel
Expertise	> Guidance by experienced lead auditors
Templates	> Tried-and-tested documents certified by an accredited certification authority
Costs	> The selection of modules allows you to control the costs
Training	> Several people can take part in the webinars

Project schedule in detail

Webinar series:

You will receive in four webinars practical guidance on preparing for the certification according to ISO 45001 from an experienced lead auditor. The participants will receive a training certificate.

Templates:

You will receive our tried-and-tested templates for the ISO 45001 documentation for preparation of the certification. Integration into an existing environmental management system in accordance with ISO 14001 is also taken into account.

Optional consultation:

Experienced lead auditors will assist you on request with individual on-site appointments or an internal audit. You can determine the scope and depth of the consultation.
